Subject: Background tissue sampling

Hi Rob,

Now that sampling activities related to the recently conducted background tissue sampling effort are complete, could you please send me a final tally of all specimens caught?

As we discussed, I do want to send an email to the partner agencies asking if they'd like any of the excess mass, but at this point might as well wait until I have some more details to share with them. I had held off sending the email since I thought you had asked me to. I'll send something out as soon as I get the final tally.

Thanks,
Stephanie
